Research Interests: AI for Quantum Computing, Quantum Machine Learning, Machine Learning, and Software Engineering

EDUCATION

University of Texas at Dallas

Bachelor of Science in Computer Science — GPA: 3.6/4.0

Relevant Coursework: Advanced Algorithm Design & Analysis, Introduction to Quantum Information, Quantum Physics for Computing & Information, Fundamentals of Quantum Computing, Artificial Intelligence, Data Structures & Algorithms, Probability & Statistics in CS, Software Engineering

University of Texas at Tyler

Computer Science coursework (transferred to UT Dallas)

Richardson, TX

Aug. 2024 – May 2027

Tyler, TX

Aug. 2023 – May 2024

RESEARCH EXPERIENCE

Undergraduate Researcher

University of Texas at Dallas Computer Science Department

Dec. 2025 – Present

Richardson, TX

- Advised by Soneya Hossain (UT Dallas) and Jiyuan Wang (Tulane University)
- Developing novel quantum software engineering techniques for QBugBench, a benchmark dataset for quantum program bugs
- Implemented static mutation testing patterns for quantum circuits to systematically surface bugs in quantum programs
- Contributing to a benchmark suite with findings targeted for publication

Computational Research Assistant Intern

University of Texas at Dallas

Oct. 2024 – Dec. 2024

Richardson, TX

- Validated a graduate student's R script, ensuring accuracy and reliability across multiple datasets
- Created a step-by-step SOP to help lab members reliably apply the script to future research
- Labeled and organized lab equipment to improve tracking

TECHNICAL EXPERIENCE

Software Engineering Intern IV

Atlassian

May 2026 – Aug. 2026

San Francisco, CA

- Built and shipped two new Loom automations end-to-end, enabling users to automatically trigger workflows in Jira, Confluence, and Slack
- Architected the technical design for both automations, collaborating with engineers, designers, and product managers across multiple teams
- Delivered production-ready code across 4 repositories with full test coverage and a staged rollout plan for enterprise customers

Software Engineering Intern III

Atlassian

May 2025 – Aug. 2025

Austin, TX

- Engineered and deployed enhancements to 3 key Confluence Team Calendar filters, boosting user interaction by 118.75%
- Architected a bonus calendar feature from scratch and documented system architecture
- Tested and released advanced search functionality with 100% test coverage, reducing user search time by 80%
- Collaborated in an agile pod with 3 SWE Interns to deliver the product in 8 weeks

Software Engineering Intern II

Atlassian

May 2024 – Aug. 2024

Austin, TX

- Migrated tests from Cypress to Playwright, reducing test flakiness by 68% and cutting execution time by 20%
- Increased automated test coverage for Atlassian Guard by 30%, enabling faster and more reliable releases
- Resolved 10 accessibility tickets, improving compliance and usability for 225,000+ users

Software Engineering Intern I

Atlassian

May 2023 – Aug. 2023

Austin, TX

- Launched “Work & Learn Together” sessions to increase team engagement
- Refactored Devbucket v2, reducing setup time for new engineers by 30%
- Developed integration tests for microservice templates, increasing coverage by 25%

Software Development Intern

Indeed

May 2022 – Aug. 2022

Remote

- Developed improvements to virtual background functionality using React and JavaScript

FELLOWSHIPS & PROGRAMS

AI/ML Fellow

Break Through Tech

Apr. 2026 – Present

Remote

- Selected as 1 of 1,300 fellows from 4,000+ applicants for a competitive national AI/ML fellowship
- Completing the Cornell Machine Learning Foundations curriculum through weekly labs and assignments, building supervised learning models in Python

Ignite Fellow

AI4ALL

Apr. 2026 – Present

Remote

- Selected for a national fellowship developing early-career AI talent through mentorship and applied project work
- Completing an applied AI curriculum through weekly technical sessions and mentor check-ins

Fellow

CodePath

Sep. 2025 – Jun. 2026

Remote

- Completed Intro to Technical Interview Prep (TIP101) and Foundations of AI Engineering coursework
- Built applied AI projects including a log-based bug classifier and a content-based music recommender

Fellow

ColorStack

Jul. 2025 – Present

Remote

Student

Code2College

Sep. 2021 – Aug. 2023

Remote

- Completed 6 courses spanning full-stack development, mobile applications, and software engineering fundamentals

LEADERSHIP & ORGANIZATIONS

Artificial Intelligence Society, AI Academy Officer

University of Texas at Dallas

May 2025 – Present

Richardson, TX

- Organized & designed workshop series on AI/ML fundamentals, reaching 200+ students
- Coordinated HackAI with over 450+ participants
- Managed logistics and setup for hands-on events, including audio, video, and streaming operations

Artificial Intelligence Society, Operations Officer

University of Texas at Dallas

Mar. 2025 – May 2025

Richardson, TX

National Society of Black Engineers (NSBE), Member

University of Texas at Dallas

Aug. 2024 – Present

Richardson, TX

Association for Computing Machinery (ACM), Member

University of Texas at Dallas

Aug. 2024 – Present

Richardson, TX

PROJECTS

Explainable AI Research — xAI-alibi | *Python, Alibi, scikit-learn* | github.com/anothergrind/xAI-alibi

- Implemented counterfactual explanations (Alibi CounterfactualProto) and anchor-based rule extraction (AnchorTabular) to interpret black-box Random Forest classifiers
- Applied 2 post-hoc interpretability techniques across 2 Random Forest models on the UCI Wine Quality dataset, generating the minimal feature changes needed to flip low-to-high quality predictions across 5 test instances

PawPal — AI Pet Companion | *Python, Computer Vision, NLP* | github.com/anothergrind/pawpal

- Built a computer vision classifier to identify pet breeds from user-submitted images
- Integrated an NLP conversational interface to answer pet care questions

Content-Based Music Recommender | *Python* | github.com/anothergrind/music_recommender_simulation

- Built an explainable music recommender with a weighted feature-scoring model across genre, mood, energy, and acoustic dimensions
- Added a greedy diversity re-ranker with artist/genre penalties to fix repetitive top-5 output, validating ranking behavior across 5 contrasting user profiles

Game Glitch Investigator | *Python* | github.com/anothergrind/game-glitch-investigator

- Developed an AI tool that parses game behavior logs to automatically detect and classify bugs

TECHNICAL SKILLS

Programming Languages: Java, Python, R, C/C++, TypeScript, JavaScript, HTML/CSS

Frameworks: React, Node.js, NextJS, ExpressJS, Playwright, Material-UI

Developer Tools: Git, Docker, Postman, Supabase, VS Code, Linux/Unix

Libraries: Qiskit, pandas, NumPy, Matplotlib, scikit-learn, Alibi

Spoken Languages: English (Native), Igbo (Intermediate), Spanish (Beginner)

CERTIFICATES

Quantum Information Science: The University of Texas at Dallas	May 2027
Biobehavioral Data Science: The University of Texas at Dallas	May 2027
AI Ignite: AI4ALL	November 2026
Machine Learning Foundations: Cornell University	August 2026
Foundations of AI Engineering: CodePath	May 2026
Intro to Technical Interview Prep: CodePath	December 2025
Machine Learning Specialization: DeepLearning.AI	Sep. 2025
Python for Data Science, AI & Development: IBM	March 2025

AWARDS

Comet Transfer Scholarship: The University of Texas at Dallas	2024 – 2027
